

Xbox Brand Overview

Our Brand Manifesto

Xbox transforms.

The mundane to the fantastic.

The expected to the surprising.

The everyday to the I've-never-seen-that-before.

Xbox transforms the way people play, communicate, socialize, and dream.

People won't seek out these new experiences for themselves, but they're amazed when they have one.

Someone has to transform entertainment from what it is today to what it's going to be.

And somebody has to make this future accessible to everyone.

That someone is Xbox.

And that somebody is you.

The parent brand behind the products and services.

The current platform that consists of consoles, games, and accessories.

Kinect is a set of experiences and products on the Xbox 360 platform.

The connected service for gaming, entertainment, and social experiences.

Xbox Brand Positioning

Our Brand Positioning is the message, commitment, and vision that guides our work, products, and services. It is made up of our **Positioning Statement**, our **Values**, and our **Traits**.

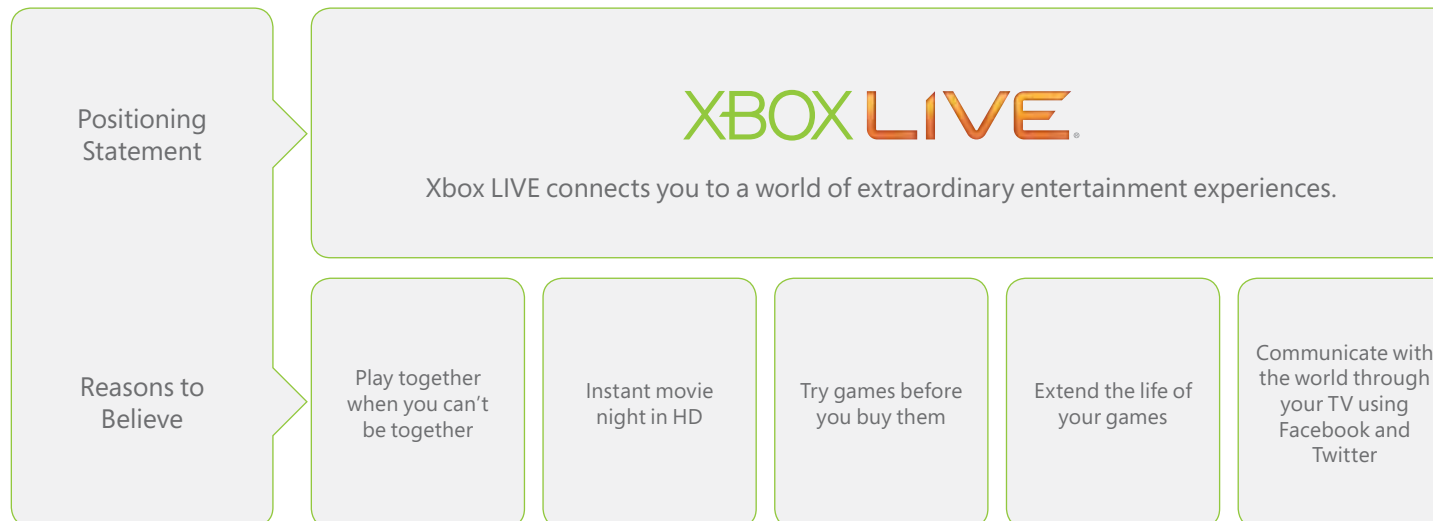

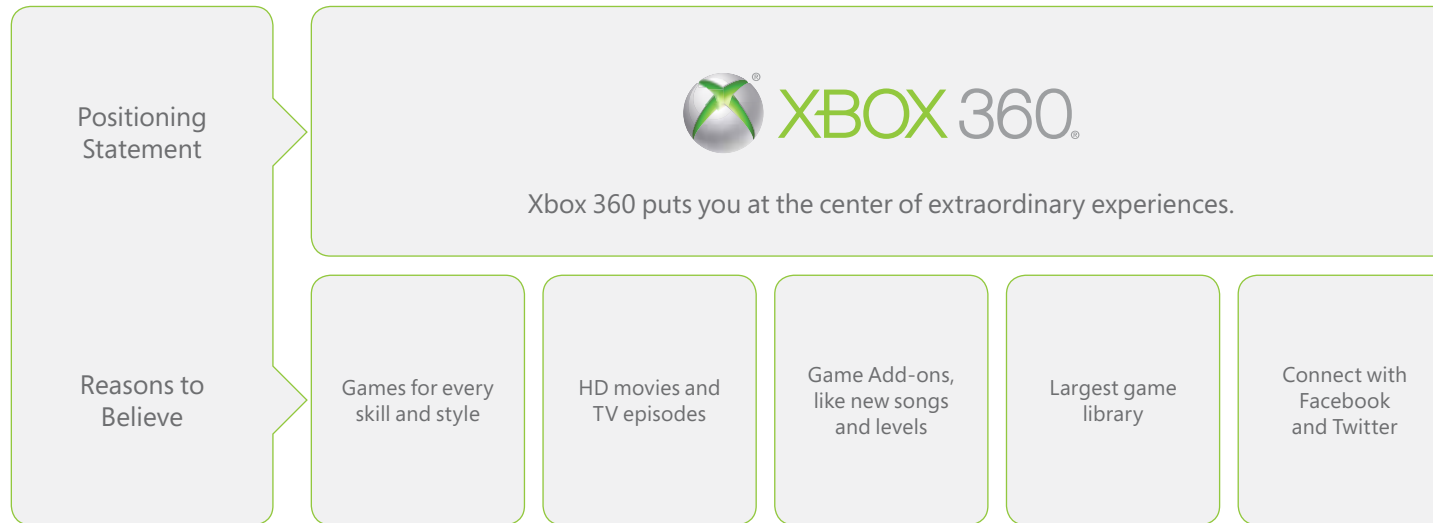

The Positioning Statement amplifies the transition from a product-centric brand to an experience-centric brand.

The Values make our work, products, and services distinctively Xbox.

The Traits define how our brand looks, feels, and sounds.

The positioning, values, and traits apply to both the Xbox 360 platform and the Xbox LIVE service.

Xbox 360 and Xbox LIVE Positioning

Xbox 360 is a sub-brand of Xbox, and is the hub for gaming, entertainment, and social experiences.

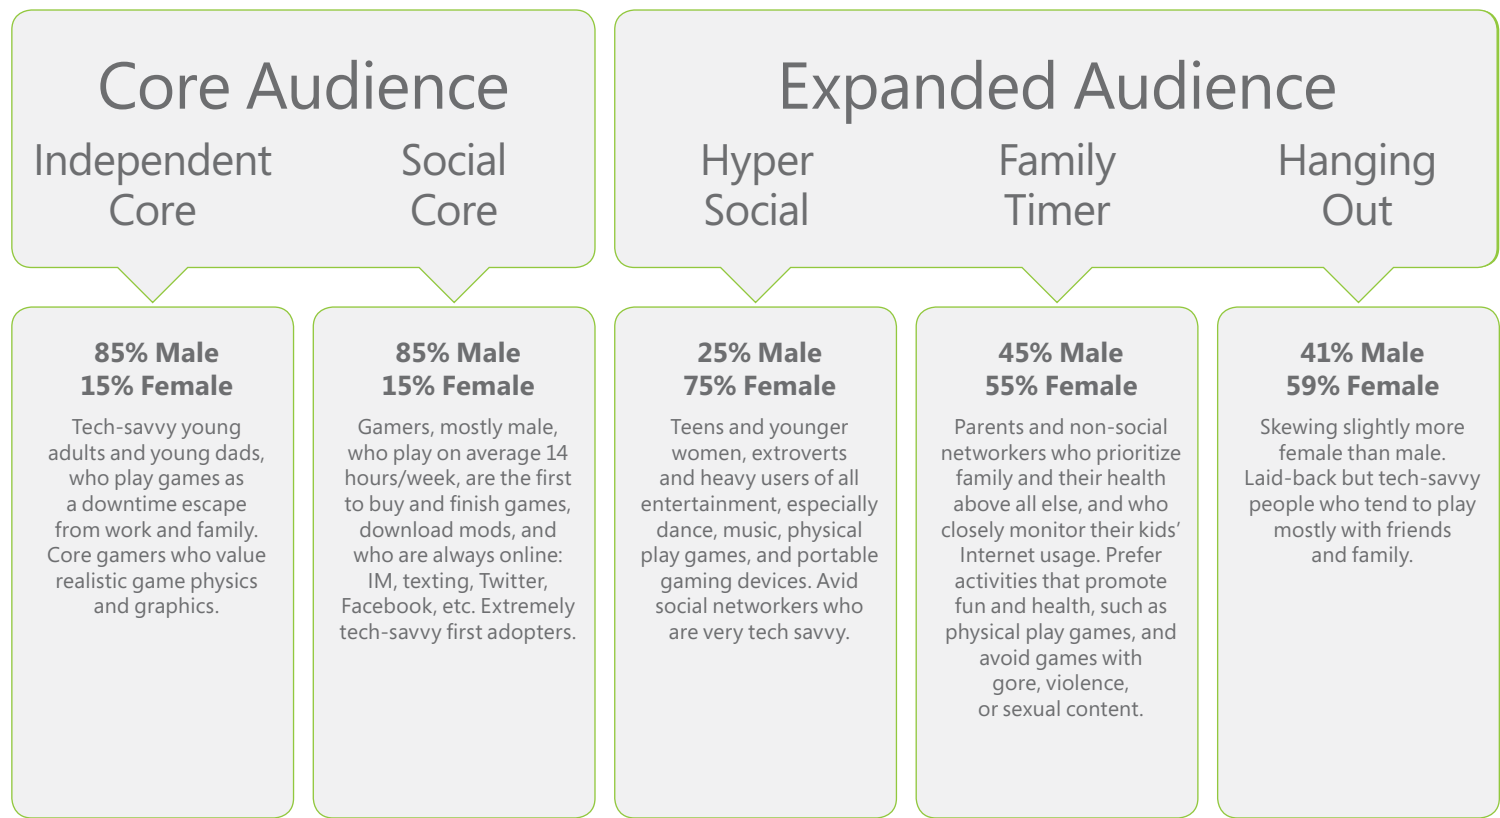

Xbox 360 is the games you love, the entertainment you love, and the people you love.

Xbox LIVE is a sub-brand of Xbox, and is the online service of the Xbox 360 Console and a complete entertainment experience.

Play, watch, and connect with friends around the world—Xbox LIVE is your connection to more games, entertainment, and fun.

Kinect is not a brand, Kinect is a set of experiences and products on the Xbox 360 platform and follows the same positioning and reasons to believe as Xbox 360.

Expanding Our Audience

The core gaming audience will always be important to us. We will continue to develop experiences and games that interest the core.

With **Kinect** for **Xbox 360**, we have an experience that allows us to reach out to groups who are not comfortable with a controller and invite them into the amazing world of Xbox.

The guidelines are divided into three sections. Use the appropriate section for your product and message.

Xbox 360 Guidelines (page 8)

When To Use

1. When creating communications that feature the Xbox 360 platform that consists of consoles, games, and accessories.
2. With communications that feature controller- as well as Kinect-based experiences, if the primary call to action of the piece is platform oriented.
3. If there is no clear call to action in a mixed-experience piece, Xbox 360 branding should take preference over Kinect and Xbox LIVE branding.

Kinect Guidelines (page 57)

When To Use

1. When creating communications that feature only the Kinect experience, products, or games.
2. With communications that feature Kinect as well as Xbox 360 or Xbox LIVE experiences, if the primary call to action of the piece is Kinect oriented.
3. If there is no clear call to action in a mixed-experience piece, Kinect branding should take preference over Xbox LIVE.

Xbox LIVE Guidelines (page 99)

When To Use

1. When creating communications that feature only Xbox LIVE experiences, products, or games.
2. With communications that feature Xbox LIVE as well as Kinect or Xbox 360 experiences, if the call to action of the piece is Xbox LIVE oriented.
3. If there is no clear call to action in a mixed-experience piece, Kinect branding should take preference over Xbox LIVE.

2. It should not exceed 10% of the layout.

The colors, CMYK, RGB, and hexadecimal breakdowns shown here have not been evaluated by Pantone for accuracy and may not match the PANTONE Color Standards. Consult current PANTONE Color Publications for accurate color. PANTONE® is the property of Pantone LLC.

1. Do not alter any of the colors from how they have been provided.
2. White is a very important color that allows the other colors in the palette to stand out. Always incorporate white space into your communication.

Segoe Regular
Segoe Italic
Segoe Semibold
Segoe Bold

How To

1. Headlines and subheads can be set in title case, sentence case, or uppercase and should have leading of +4 pt. and kerning of 0.
2. Body copy should have leading of +2 pt. and kerning of 0.
3. Do not use italics in headlines.
4. Typography should be no smaller than 4 pt.

When To Use

1. Segoe is the typeface used in all Xbox marketing materials.
2. Use Segoe UI for web based communications.

Horizontal Logo

When To Use

1. The Horizontal logo should be the primary logo that represents Xbox 360 in all communications.

Stacked Logo

When To Use

1. The Stacked logo can be used if spacing does not permit the use of the Horizontal logo.

Clear Space

The height of the word "Xbox 360," represented by "A" in the example below, is the basis for the amount of space surrounding the logo that needs to remain free of any other graphic element. The logo can sit over photography, but no other logo, type, or graphic should enter the clear space.

Minimum Size

The Xbox 360 logo may not be re-sized to the point where the length of "B" is less than .75" for print or 54 pixels for web. Each example below is shown at the minimum size. The maximum size is big as your project allows. Remember—bigger is not always necessarily better.

1. Do not alter any of the components of the logo.
2. Do not modify the logo with outlines, drop shadows, or any other filters or treatments.
3. Use the four-color logo whenever possible.
4. Comply to the clear space and minimum size rules, as noted on the left.
5. The logo should not act as or be part of a headline or copy.

Green Patterns

Use green Patterns for communications that feature the Xbox 360 platform (consoles, games, and accessories), and combined controller- and Kinect-based experiences (when the primary call to action is platform oriented). Give preference to Xbox 360 branding over Kinect and Xbox LIVE branding when there is no clear call to action.

Preferred Versions

Ribbon

The Ribbon Patterns represent an imaginative, inviting journey. They communicate flowing, unified energy with depth and discovery.

Arc

The Arc Patterns represent accessible, fun energy. They communicate simple motion that is optimistic and uplifting.

When To Use

1. Ribbons and Arcs are the primary Patterns used to represent the brand and should be used in communications whenever possible.
2. Monochromatic and Full-Saturation Patterns are available for backgrounds or color alternatives to white.

Alternate Version

Circles

The Circle Patterns represent diverse social interactions. They communicate individual and group social energy from friends and family circles.

When To Use

1. Only use in applications where the space does not have a clear beginning or end, or for variety when multiple Patterns are being used.
2. See page 19 for help using multiple Patterns.

Original Asset

1. Patterns must be cropped to bleed and can be scaled, rotated, or flopped. But they must retain their original proportion.
2. Do not stretch the Pattern to fit.
3. Patterns should be 20%-60% of layout. Do not crop Patterns too tightly.
4. Keep a white background whenever possible.
5. Only use Motional Patterns that have been provided—do not make up your own.
6. Follow directions on page 19 for how to use multiple Patterns.

5. Strive to use between four and eight Circles per crop.
6. The Circle Pattern should always bleed off one, two, or three sides of the layout.
7. Two different crops of the Pattern may be combined but should not overlap.
8. The minimum size of the smallest Circle should be no less than .75" in print, or 54 pixels online.
9. Never create your own Pattern. Use only the existing Patterns.

When To Use

1. Only use in applications where the space does not have a clear beginning or end or for variety when multiple Patterns are being used.
2. See page 19 for help using multiple Patterns.

Multiple Patterns

Multiple Patterns On One Plane

Multiple Planes

Pattern In Front of Another

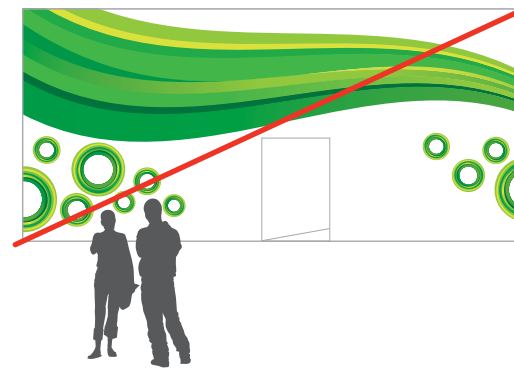

Assets are not shown to scale.

How To

1. Individual Patterns may be combined on the same plane to make it appear as though the Pattern is continuous, but all the Patterns on the same plane should be from only one category (e.g., Ribbons, Arcs, and Circles).
2. The edges of the Patterns should not touch each other.
3. Different categories of Patterns may be used in the same environment (but never on the same surface) or on consecutive spreads in a book (but never on the same spread).
4. Circle Patterns are used to add variety, or when you need to place a Pattern in front of a Ribbon or Arc.
5. Do not place a Pattern around any 360-degree object to create a continuous Pattern.
6. Do not mirror the Patterns.

When To Use

1. Use multiple Patterns in an environment—such as a trade show, or throughout a book, Web site, or video/animation—to show the breadth and variety of our brand.

Do not place two Patterns on the same plane.

Do not mirror the Ribbon Patterns.

Do not mirror the Arc Patterns.

How To

1. Keep a white background whenever possible.
2. Xbox Primary Green or the gradient color fill can be added to the background on one side of the Ribbon or Arc Pattern.
3. Do not use a transition to color with Circle Patterns.
4. The fill should only be on the Xbox Primary Green side of the Pattern.
5. The flare of the gradient color fill should be next to the Pattern.
6. Gradients and color fills can be increased in size as needed. Do not stretch the proportions of the gradient fill file.
7. Do not use a transition to color if an Environmental photo is being used, as it does not allow for any white space.
8. Do not fill with any color other than Xbox Primary Green or the gradient color fill.

When To Use

1. For variety, when there is too much white space.

Do not transition to color with Circle Patterns.

Do not transition to color when using an Environmental photo.

Controller-based Photography

Captures controller-based game and entertainment experiences.

When To Use

1. For communications that feature controller-based experiences and specific accessories.

Kinect Environmental Photography

3. When combining separate photos to represent more than one game scenario, differentiate the players with size or space so that it is clear they are not playing together.
4. It is preferable to use an Environmental photograph together with Seamless photography to show game space and sensor in context.
5. Ensure that the photograph reflects the appropriate age ratings for the game experiences in your communication.

When To Use

1. The Stacked logo should be the primary logo that represents the sensor or the Kinect experience in all communications.

Horizontal Logo

When To Use

1. The Horizontal logo can be used if spacing does not permit the use of the Stacked logo.

Alternate Versions

KINECT™

Wordmark

When To Use

1. The Wordmark is for use in communications that are very clearly Xbox 360 branded and already contain the Xbox 360 logo.

Logo with Sensor

When To Use

1. The Logo with Sensor is for use in isolated communications where there is no other photo of the sensor in the communication. Usage must be approved by brand team at xboxbran@microsoft.com.

Clear Space

The height of the word "Kinect," represented by "A" in the example below, is the basis for the amount of space surrounding the logo that needs to remain free of any other graphic element. The logo can sit over photography, but no other logo, type, or graphic should enter the clear space.

Minimum Size

The versions with the Xbox 360 logo may not be re-sized to the point where the length of "B" is less than .75" for print or 54 pixels for web. Each example below is shown at the minimum size. The maximum size is big as your project allows. Remember—bigger is not always necessarily better.

The Kinect wordmark may not be re-sized to the point where the length of "C" is less than .625" for print and 45 pixels for web.

1. Do not alter any of the components of the logo.
2. Do not modify the logo with outlines, drop shadows, or any other filters or treatments.
3. Use the four-color logo whenever possible.
4. Comply to the clear space and minimum size rules, as noted on the left.
5. The logo should not act as or be part of a headline or copy.

Purple Patterns

Use purple Patterns for communications that feature Kinect-only experiences, products, or games, and combined Kinect and Xbox LIVE experiences (when the primary call to action is Kinect oriented). Give preference to Kinect branding over Xbox LIVE branding when there is no clear call to action.

Preferred Versions

Ribbon

The Ribbon Patterns represent an imaginative, inviting journey. They communicate flowing, unified energy with depth and discovery.

Arc

The Arc Patterns represent accessible, fun energy. They communicate simple motion that is optimistic and uplifting.

When To Use

1. Ribbons and Arcs are the primary Patterns used to represent the brand and should be used in communications whenever possible.
2. Monochromatic Patterns are available for more color saturation.

Alternate Version

Circles

The Circle Patterns represent diverse social interactions. They communicate individual and group social energy from friends and family circles.

When To Use

1. Only use in applications where the space does not have a clear beginning or end, or for variety when multiple Patterns are being used.
2. See page 68 for help using multiple Patterns.

Original Asset

purple_ribbon_11.eps

1. Patterns must be cropped to bleed and can be scaled, rotated, or flopped. But they must retain their original proportion.
2. Do not stretch the Pattern to fit.
3. Patterns should be 20%-60% of layout. Do not crop Patterns too tightly.
4. Keep a white background whenever possible.
5. Only use Motional Patterns that have been provided—do not make up your own.
6. Follow directions on page 68 for how to use multiple Patterns.

2. Do not stretch the Pattern to fit.
3. Patterns should be 20%-50% of layout.
4. Use a white background whenever possible.
5. Strive to use between four and eight Circles per crop.
6. The Circle Pattern should always bleed off one, two, or three sides of the layout.
7. Two different crops of the Pattern may be combined but should not overlap.
8. The minimum size of the smallest Circle should be no less than .75" in print, or 54 pixels online.
9. Never create your own Pattern. Use only the existing Patterns.

When To Use

1. Only use in applications where the space does not have a clear beginning or end or for variety when multiple Patterns are being used.
2. See page 68 for help using multiple Patterns.

Multiple Patterns

Multiple Patterns On One Plane

Multiple Planes

Pattern In Front of Another

Assets are not shown to scale.

How To

1. Individual Patterns may be combined on the same plane to make it appear as though the Pattern is continuous, but all the Patterns on the same plane should be from only one category (e.g., Ribbons, Arcs, and Circles).
2. The edges of the Patterns should not touch each other.
3. Different categories of Patterns may be used in the same environment (but never on the same surface) or on consecutive spreads in a book (but never on the same spread).
4. Circle Patterns are used to add variety, or when you need to place a Pattern in front of a Ribbon or Arc.
5. Do not place a Pattern around any 360-degree object to create a continuous Pattern.
6. Do not mirror the Patterns.

Do not place two Patterns on the same plane.

When To Use

1. Use multiple Patterns in an environment—such as a trade show, or throughout a book, Web site, or video/animation—to show the breadth and variety of our brand.

Do not mirror the Ribbon Patterns.

Do not mirror the Arc Patterns.

How To

1. Keep a white background whenever possible.
2. Xbox Primary Green or the gradient color fill can be added to the background on one side of the Ribbon or Arc Pattern.
3. Do not use a transition to color with Circle Patterns.
4. The fill should only be on the Xbox Primary Green side of the Pattern, not on the purple side.
5. The flare of the gradient color fill should be next to the Pattern.
6. Gradients and color fills can be increased in size as needed. Do not stretch the proportions of the gradient fill file.
7. Do not use a transition to color if an Environmental photo is being used as it does not allow for any white space.
8. Do not fill with any other color other than Xbox Primary Green or with the gradient color fill.

When To Use

1. For variety, when there is too much white space.

How To

1. Always ensure a full-color Pattern is seen somewhere else in the communication.

When To Use

1. For backgrounds.
2. In a copy-heavy on-screen presentation.
3. For a visual break in an environment that is dominated by the Patterns.
4. If there are a lot of Patterns in the area, consider using Kinect Purple and not a Monochromatic Pattern.

How To

1. It is OK to use multiple Patterns in a video piece, but they should not be seen at the same time, and they should not morph into each other.

Kinect Environmental Photography

Environmental photography shows real people having real Kinect experiences on screen. It shows the space, setup, and how the sensor makes you the controller.

When To Use

1. For communications that feature the Kinect experiences, products, or games.

Kinect Seamless Photography

Seamless photography captures the spirit and movement of Kinect.

When To Use

1. For communications that feature the Kinect experiences, products, or games.
2. Effective in large areas for creating maximum visual impact, such as banners, billboards, and posters.

Xbox LIVE Avatars with Seamless Photography

Avatars paired with seamless photography show the 1:1 experience of controlling an Avatar with your body.

When To Use

1. For communications that feature the Kinect experiences, products, or games.

Sample Crop

Removing floor and ceiling from photo.

1. These photos should not be retouched in any way.
2. Photos **must** be cropped to look like a real living-room environment.
3. Photos should not show a lot of wall or floor within the crop.
4. Always keep the television, console, sensor, and player(s) in the photo.
5. Photos should always be on the purple edge of the Pattern.
6. Ensure that the photograph reflects the appropriate age ratings for the game experiences in your communication.

When To Use

1. For communications that feature the Kinect experiences, products, or games.

Sample Crop

Examples

Combined photos playing the same game.

Multiple photos combined playing different games.

Assets are not shown to scale.

1. These photos should not be retouched in any way.
2. When combining separate photos to represent a multiplayer scenario, the individuals must be close together and must be interacting in a manner that is possible during gameplay.
3. When combining separate photos to represent more than one game scenario, differentiate the players with size or space so it is clear they are not playing together.
4. It is preferable to use an Environmental photograph together with Seamless photography to show game space and sensor in context.
5. Ensure that the photograph reflects the appropriate age ratings for the game experiences in your communication.

When To Use

1. For communications that feature the Kinect experiences, products, or games.
2. Effective in large areas for creating maximum visual impact, such as banners, billboards, and posters.

Xbox LIVE Avatars with Seamless Photography

How To

1. The Avatars should not be retouched in any way.
2. Avatars should only be paired with their matching human counterpart and should be in the same pose.
3. The Avatar should be 60%-80% the size of its human counterpart.
4. To use a stand-alone Avatar, see the Xbox LIVE guidelines.

When To Use

1. For communications that feature the Kinect experiences, products, or games.

Gloss Console with Sensor

When To Use

1. As the **primary photo** for promoting the Kinect experience and Xbox 360 platform.
2. When promoting the Xbox 360 250GB with Kinect bundle.

Matte Console with Sensor

When To Use

1. When promoting the Xbox 360 4GB with Kinect bundle.

Kinect Sensor

Sensor stand-alone

When To Use

1. In promotions that feature only the sensor accessory.

Minimum Size

The console photography should be no smaller than 2" in height, represented by "A" in the example below, and no less than 10% of the layout or 150 pixels in height online.

The sensor photography should be no smaller than .625" in height, represented by "B" in the example below, and no less than 10% of the layout or 45 pixels in height online.

1. These photos should not be retouched in any way.
2. The console or sensor photography should be no less than 10% of the layout.
3. Photos of the sensor should only be used with the Xbox 360 S console, not with the original Xbox 360.
4. Do not combine different sensor and console photos. Use the files as they were provided.
5. When pairing console photography with game-box art, the game art may be enlarged relative to the console, so long as the console is not dwarfed.

How To

1. Headlines and subheads can be set in title case, sentence case, or uppercase and should have leading of +4 pt. and kerning of 0.
2. Body copy should have leading of +2 pt. and kerning of 0.
3. Do not use italics in headlines.
4. Typography should be no smaller than 4 pt.

When To Use

2. Use Segoe UI for web based communications.

Stacked Logo

When To Use

1. The Stacked logo should be the primary logo that represents Xbox LIVE in all communications.

Horizontal Logo

When To Use

1. The Horizontal logo can be used if spacing does not permit the use of the Stacked logo.

Clear Space

The height of the word "Xbox," represented by "A" in the example below, is the basis for the amount of space surrounding the logo that needs to remain free of any other graphic element. The logo can sit over photography, but no other logo, type, or graphic should enter the clear space.

Minimum Size

The logo may not be re-sized to the point where the length of "B" is less than .75" for print or 54 pixels for web. Each example below is shown at the minimum size. The maximum size is big as your project allows. Remember—bigger is not always necessarily better.

1. Do not alter any of the components of the logo.
2. Do not modify the logo with outlines, drop shadows, or any other filters or treatments.
3. Use the four-color logo whenever possible.
4. Comply to the clear space and minimum size rules, as noted on the left.
5. The logo should not act as or be part of a headline or copy.

Orange Patterns

Use orange Patterns for communications that feature Xbox LIVE-only experiences, products, or games, and combined Xbox LIVE and Kinect or Xbox 360 experiences (when the primary call to action is Xbox LIVE oriented). Give preference to Kinect branding over Xbox LIVE branding when there is no clear call to action.

Preferred Versions

Ribbon

The Ribbon Patterns represent an imaginative, inviting journey. They communicate flowing, unified energy with depth and discovery.

Arc

The Arc Patterns represent accessible, fun energy. They communicate simple motion that is optimistic and uplifting.

When To Use

1. Ribbons and Arcs are the primary Patterns used to represent the brand and should be used in communications whenever possible.
2. Monochromatic Patterns are available for backgrounds or color alternatives to white.

Alternate Version

Circles

The Circle Patterns represent diverse social interactions. They communicate individual and group social energy from friends and family circles.

When To Use

1. Only use in applications where the space does not have a clear beginning or end, or for variety when multiple Patterns are being used.
2. See page 113 for help using multiple Patterns.

Multiple Patterns

Multiple Patterns On One Plane

Multiple Planes

Pattern In Front of Another

Assets are not shown to scale.

How To

1. Individual Patterns may be combined on the same plane to make it appear as though the Pattern is continuous, but all the Patterns on the same plane should be from only one category (e.g., Ribbons, Arcs, and Circles).
2. The edges of the Patterns should not touch each other.
3. Different categories of Patterns may be used in the same environment (but never on the same surface) or on consecutive spreads in a book (but never on the same spread).
4. Circle Patterns are used to add variety, or when you need to place a Pattern in front of a Ribbon or Arc.
5. Do not place a Pattern around any 360-degree object to create a continuous Pattern.
6. Do not mirror the Patterns.

When To Use

1. Use multiple Patterns in an environment—such as a trade show, or throughout a book, Web site, or video/animation—to show the breadth and variety of our brand.

Do not place two Patterns on the same plane.

Do not mirror the Ribbon Patterns.

Do not mirror the Arc Patterns.

How To

1. Keep a white background whenever possible.
2. Xbox Primary Green or the gradient color fill can be added to the background on one side of the Ribbon or Arc Pattern.
3. Do not use a transition to color with Circle Patterns.
4. The fill should only be on the Xbox Primary Green side of the Pattern.
5. The flare of the gradient color fill should be next to the Pattern.
6. Gradients and color fills can be increased in size as needed. Do not stretch the proportions of the gradient fill file.
7. Do not use a transition to color if an Environmental photo is being used, as it does not allow for any white space.
8. Do not fill with any color other than Xbox Primary Green or the gradient color fill.

When To Use

1. For variety, when there is too much white space.

Do not transition to color with Circle Patterns.

Do not transition to color when using an Environmental photo.
